

DRF

Resource Conservation Solutions

Are Rising Water Costs Eroding Your Bottom Line?

Tired of paying the extra 30% (on average) water waste?

Facing increasing insurance premiums and liability without having a way to detect and control water damage?

Realizing water has become the most expensive utility?

What can you do about it?

We can provide an integrated water waste and risk mitigation solution. Our services involve a mix of cutting-edge technologies with first-class manpower, real-time active alert monitoring systems, fail safe direct shut off mechanisms, and immediate mobile response. And our work is backed by an Energy Savings Guarantee along with the real-time data.

Do You Know How Much Water is Wasted at Your Property?

- A faucet leak at 1 drip per second can waste 3,000 gallons per year
- Toilets account for 45% of all indoor water use in a typical residence
- Conservative estimates show that 20% of all toilets leak
- A running toilet can waste 1 gallon per minute – 525,600 gallons per year
- High efficiency faucet aerators and showerheads reduce water use by at least 30% with improved performance
