Are Rising Water Costs Eroding Your Bottom Line?

Let Us Help Eliminate Your Water Waste Pain With Our

DRF H2Ossessment

A professional H2Ossessment for your property is the best way to help understand:

- Your current water consumption, rate and billing
- How your property compares to similar properties
- Areas where your property can SAVE and how it pays for itself
- What to expect in the future from your city, village or town

Water costs are increasing at an alarming rate with no end in sight. Nationally, water rates increased over 50% from 2010 to 2017 – and Chicago saw one of the highest increases at 89.6%!¹

The only way to save money is to reduce consumption – and the best way to reduce consumption is to eliminate leaks. No matter the size of your property – 6 units or 600 units – our H2Ossessment program is saving properties 30% or more on water costs!

You can't afford to wait! Contact us today to schedule your Level 1 Assessment to identify how much water is being wasted at your property and your potential savings.

Do You Know How Much Water is Wasted at Your Property?

- A faucet leak at 1 drip per second can waste 3,000 gallons per year
- Toilets account for 45% of all indoor water use in a typical residence
- Conservative estimates show that 20% of all toilets leak
- A running toilet can waste 1 gallon per minute – 525,600 gallons per year
- High efficiency faucet aerators and showerheads reduce water use by at least 30% with improved performance

DRF's Resource Conservation Solutions programs have saved millions of gallons of water and thousands of therms for multi-family properties, from apartment buildings and condos to universities and medical facilities.

Resource

An economic or productive factor required to accomplish an activity. Resources are land, labor, and capital; energy, information, expertise, management, and time.

Conservation

The protection, preservation, management, or restoration of resources; prevention of injury, decay, waste, or loss.

Solutions

The process of determining the answer to a problem or dealing with a difficult situation; a method of solving; the correct answer to a puzzle.

AN INVESTMENT THAT SAVES THE EARTH, SAVES MONEY, AND PAYS FOR ITSELF!
